About Me

Computer Science graduate with hands-on experience in C# and ASP.NET MVC. Built and deployed a SaaS scheduling platform in MVP with real clients. Skilled in problem-solving, system design, and agile teamwork.

EDUCATION

B.Sc. in Computer Science   **2022 – 2025 (Graduated)**

Gained a solid foundation in software engineering, programming languages, and system design through a combination of theory and hands-on projects.

SolarFlare Angular + Backend in C# Program: **2024 - 2025**

Focused on full stack development in Angular and agile teamwork in large-scale app delivery.

AWS re/Start Bootcamp: **2022 - 2023**

Completed intensive training with a team deployment project using AWS S3, EC2, and Docker.

EXPERIENCE

Software Engineering Intern – MindoLife – Haifa   **2024 - Present**

Collaborated with a large development team to maintain and enhance an existing IoT system. Contributed to internal tools with a focus on scalability and performance. Gained practical experience in agile development, real-world debugging, and production-level coding, working with C# and Angular.

Founder / Developer – DoJourney (Startup Project)   **2024 - Present**

Converted my final university project into a live SaaS platform using ASP.NET MVC, currently in MVP testing with salon clients. The system manages appointment scheduling and sends automated WhatsApp reminders via Twilio API.

NOC Engineer – Au10tix, Hod-Hasharon   **2023 -2025**

Monitored and maintained network infrastructure to ensure high availability and performance. Responded to incidents and collaborated with cross-functional teams to resolve complex issues while maintaining documentation.

PROJECTS

Car Wash Dashboard in *SolarFlare Program* (Angular, REST APIs)   **Link**

Developed a car wash management dashboard in a 3-member Agile team using Angular. Implemented key features and integrated with a live backend API, gaining hands-on experience in API integration and frontend architecture.

DoJourney – SmartScheduler (ASP.NET MVC, Twilio API)   **Link**

Built an end-to-end appointment scheduling and CRM system that sends automatic WhatsApp notifications via Twilio. Streamlines salon operations. Live MVP in use by two clients.

Assembler Compiler (C)   **Link**

Built a compiler that translates assembly language into machine code, deepening understanding of low-level computing

Encrypted File Transfer System (C++, Python)   **Link**

Created a secure cross-network file transfer system using RSA encryption.

SKILLS

Languages & Frameworks:
C#, ASP.NET MVC (v8), C++, Python, Java, JavaScript, HTML/CSS, Angular
Tools & Platforms:
AWS (S3, EC2), Docker, Linux, SQL/NoSQL Databases, Twilio, Git
Core Competencies:
Problem Solving, Object-Oriented Design, Data Structures & Algorithms, System Architecture, Adaptability, Attention to Detail

Languages

English – Hebrew – Arabic
